Description

The attached patch adds a new Wiki macro `{{recent_pages}}` that displays a list of recently updated Wiki pages.

The macro displays a list of pages that have been updated within 7 days by default. The range of pages to be displayed can be changed with the days and limit options. And you can add information when the page is updated with the ``time`` option.

```
{{recent_pages}} -- displays pages updated within the past 7 days
{{recent_pages(days=3)}} -- displays pages updated within the past 3 days
{{recent_pages(limit=5)}} -- limits the maximum number of pages to display to 5
{{recent_pages(time=true)}} -- displays pages updated within the past 5 days with updated time
```

**{{recent\_pages}}** macro in a Wiki page:
