Redmine - Defect #38512

Email Notifications: offending header

2023-05-03 12:07 - Hendrik Jaeger

Status:	Confirmed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Jean-Philippe Lang		**% Done:**	0%
Category:	Website (redmine.org)		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	

Description

My rspamd scanner reports for the account registration notification the following symbol:
Symbol: XAW_SERVICE_ACCT(1.00)

which is triggered by this header:
X-Authentication-Warning: Ubuntu-2004-focal-64-minimal: www-data set sender to noreply@redmine.org using -f

I'm not sure what MTA that server is using, but it looks like sendmail❓

To prevent this header from being added, it seems you would have to add www-data to the trusted-users list, see e.g.
https://forum.howtoforge.com/threads/fix-for-x-authentication-warning.18269/

I know a few things about email, so if I can assist any further with this issue, let me know!

History

#1 - 2023-05-03 16:02 - Holger Just

- Category changed from Email notifications to Website (redmine.org)

#2 - 2023-05-03 16:14 - Holger Just

- Assignee set to Jean-Philippe Lang

#3 - 2024-06-20 16:53 - Holger Just

- Status changed from New to Confirmed
