Description

Hi

Registration confirmation email triggers the following rspamd symbol:
Symbol: MV_CASE(0.50)

code for this check is:
rspamd_config.MV_CASE = {   callback = function (task)   return task:has_header('Mime-Version', true)   end,   description = 'Mime-Version .vs. MIME-Version',   score = 0.5,   group = 'headers' }

i.e. (at least AFAIU) it checks whether the exact (i.e. case-sensitive) header name given is 'Mime-Version'.

https://datatracker.ietf.org/doc/html/rfc1521#section-3 states

```
Messages composed in accordance with this document MUST include such a header field, with the foll
owing verbatim text:

   MIME-Version: 1.0
```

i.e. the case of 'MIME' needs to be all uppercase.

History

#1 - 2023-05-03 12:58 - Pavel Rosický

this has been fixed by https://github.com/mikel/mail/pull/1503 but it isn't released in any version yet. Anyway, it's something that should be discussed there rather than here.
