Redmine - Defect #38581

2 different queries with the same fields on "My page" are not aligned

Description

I made a query for issues that need further feedback, and a query for those I'm working on currently. Both these queries are on "My page", but the columns aren't aligned.
Here is a screenshot of the same issue on this very Redmine :

- File clipboard-202305231537-w09z2.png added

You might think it's because of the difference of text size, but here it is with closer text :

#2 - 2023-05-23 15:38 - thuruk thuruk

Also, why can't I edit my own post ?

#3 - 2023-06-22 12:26 - thuruk thuruk

I ended up forcing a specific size using a theme :

```
th.cf_1 {
  white-space: normal;
  width: 100px;
}

td.fixed_version {
  white-space: normal;
  width: 200px;
}

td.buttons {
  white-space: normal;
  width: 40px;
}
```

Horrendous fix but at least it works.
