Description			
"Imagine the following date: 02/04/03			
Which does it mean?			
<ul style="list-style-type: none">• 2nd of April 2003 (European style)• 4th of February 2003 (USA style)• 3rd of April 2002			
Your answer will depend, mostly, on which country you live in."			
from: http://www.w3.org/QA/Tips/iso-date			
Please use the standard time format to avoid this kind of confusion.			
Thanks for your attention,			
Paulo Fidalgo			

History

#1 - 2007-07-14 09:30 - Jean-Philippe Lang

Added an option in rev 585, to choose the date format: language based, as defined in each lang file (default) or ISO 8601. This option can be set in Admin -> Settings.
