Description

Upon running svn update and running RAILS_ENV=production rake db:migrate, I received the following message: -

```
(in /var/www-virtuals/redmine)
rake aborted!
no such file to load -- application

(See full trace by running task with --trace)
```

Sugested fix - first line in <redmine>/vendor/plugins/redmine_bots_filter could be change from: -

require 'application'

to: -

require 'application_controller'

I downloaded the Bots plugin from http://www.redmine.org/wiki/redmine/PluginBotsFilter
