Resolution:	Duplicate		
Description Dear All, I would like to start issue number (1) for new project. But is not start and continue old project's issue number. For Example, I stopped issue number (3) and delete that project and create new project. But it is no start issue number (1). It is continued start issue number (4) at new project. The records are saved from old project issue number. It is actually auto starting issue number (1) generally. Please kindly help and give suggestion. My Redmine versions are - Redmine version 5.0.5.stable Ruby version 3.1.3-p185 (2022-11-24) [x64-mingw-ucrt] Rails version 6.1.7.2 Thanks, KKK
