**Description**

It would be very helpful to have a archive feature for wiki pages, something like closed projects.

There are some pages that don't represent a current information, but, could be interesting to maintain them as a historical record.

If a page is marked as archived the following actions could apply

- Show a badge on the top of page, informing its an archived information, so user knows that isn't a actual information
- Show a badge right after link to archived page
- Page is locked for edit
- One option on search to opt out from search in archived pages

This feature goes in distinct direction from soft delete [#18295](#), there you want preserve the track to the page, in this one the idea is to preserve the content too.
