

Redmine - Feature #38650

The design of the tracker selection UI on the custom field editing screen and the project settings screen should be aligned to create a sense of coherence and unity.

Description I would like to tidy up the selection field for trackers on the custom field editing screen for the following reasons: Enhance user experience by making it easier to locate and select trackers. Facilitate efficient data entry and management by providing a cleaner interface. So we want to unify the UI with the project settings UI.
