| Target version: | Candidate for next major release | | |
| <div>Description</div> <p>The items in the tracker selection area of the custom field setting screen are not properly aligned, making it difficult to see and easy to operate when a large number of trackers are created.</p> <p>Therefore, we have modified it to be properly aligned like the issue tracking tab in the project settings, so that it can be easily viewed even when many trackers are displayed.</p> <ul style="list-style-type: none">before trackers_selection_before.pngafter trackers_selection_after.png | | | |
