Category:	Custom fields	Estimated time:	0.00 hour
Target version:		Affected version:	5.0.3
Resolution:			
Description			
<p>Hello Redmine Developers,</p> <p>I would like to bring an alignment issue to your attention regarding the Custom Text field in Redmine.</p> <p>Currently, the Custom Text field is center aligned, whereas the Custom Long Text field is left aligned. It is generally considered a common convention to have text aligned to the left. Therefore, I would like to request if there is a way to make the Custom Text field left aligned, similar to the Custom Long Text field.</p> <p>This alignment consistency would greatly improve the user experience and ensure a more cohesive design within Redmine.</p> <p>Thank you for your attention to this matter. I appreciate your efforts in continuously improving Redmine and addressing user feedback.</p> <p>Best regards, Matt</p>
