oh, sorry. my expression is not enough.

i just wish local change of favicon.ico is ignored, and it is treated as binary.

thanks.

- Status changed from New to Closed

OK, svn:mime-type is set in [r2897](#), svn diff runs fine now. No need for svn:ignore.

IMHO, favicon.ico in repository is just a place holder and every users may replace it with their own version. so it means, change of this file is always ignorable. anyway, it's not important thing.

thanks.
