Redmine - Defect #38852

issue syntax is not kept when selecting an issue from the inline autocomplete

Description

It is a nice feature to adress tickets with a double hash, followed by the ticket id, like here:

Defect #14269: custom field not displayed but not in read_only

We have the issue, that the suggester works fine ...

... and when we hit return, an auto-correction reduces the textile code to one hash:

So the deliberate entry is lost.

Any idea whether this is a bug?
