Redmine - Defect #3886

Wrong version in Information

2009-09-17 15:04 - Christophe Absil

Status:	Closed	**Start date:**	2009-09-17
Priority:	Normal	**Due date:**

Target version:			
Resolution:		**Affected version:**	0.8.5

Description

I recently installed the 0.8.5 version. Everything went almost right. Even I was unable to follow the steps as described in
http://www.redmine.org/wiki/1/RedmineUpgrade, I managed to get a working solution. (For info the rake
db:migrate:upgrade_plugin_migrations RAILS_ENV="production" failed because of unknown task upgrade_plugin_migrations).

After the installation I checked the information page and found the following :
Redmine 0.8.4.stable (MySQL)
Default administrator account changed   True
Attachments directory writable (C:/redmine-0.8.5/files)   True
Plugin assets directory writable (C:/redmine-0.8.5/public/plugin_assets)   True
RMagick available (optional)

Why do I got 0.8.4 after the installation of the 0.8.5 ?
