Description

It would be nice to have a google AdSense plugin, similar to the google Analytics plugin, to easily integrate AdSense in redmine.

- Resolution set to Invalid

I just happened to write something like this earlier this week. It's a very simple plugin but it will let you embed "Ads" into the Redmine sidebar. It supports HTML or JavaScript ads (it just puts the raw content into the page for you) and also a simple ad rotation. You can download it from Github right now. If you have any questions or feature requests, I have a Redmine issue tracker and forums setup on my site.

(Marking issue as invalid, since it's not released to the Redmine core)
