- Status changed from New to Closed
- Affected version (unused) deleted (0.8.5)
- Resolution set to Invalid
- Affected version deleted (0.8.5)

Hi yang

You should add this help message to the forum, it's not an issue.

```
If you didn't modify the "encoding: utf8" field in database.yml, the error maybe caused by your database's encoding.
```

```
Are you sure you create the database schema with encoding of utf8?  
And we need to know your redmine version.
```

```
Please post above message to forum or write email to me.
```
