Bug was already fixed in Revision [r2887](#) for another field:

Fixed a bug that occurred in tests where the "required" span tag would be added to the :field_status translation. This resulted in an email string of:

```
<li>Status<span class="required"> *</span><span class="required"> *</span>
```

Instead of:

```
&lt;li&gt;Status: New&lt;/li&gt;
```

Seems to occur in several other fields too.

#3 - 2009-09-23 10:49 - Albrecht Backhaus

- Status changed from New to Resolved

- Assignee set to Eric Davis

This error is related to the timesheet plugin - therefore I close it here and opend a ticket in the plugin support site

#4 - 2009-10-01 00:19 - Eric Davis

- Status changed from Resolved to Closed
- Resolution set to Invalid

This was actually from my Bulk Time Entry pluign. It used something very similar to Redmine's Tabular form that I fixed in [r2887](#), I just didn't fix it in the Bulk Time Entry pluign until recently.
