

Redmine - Defect #38968

Images not showing up when space(s) in filename

2023-08-21 15:54 - Thomas B

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Files	Estimated time:	0.00 hour
Target version:		Affected version:	5.0.5
Resolution:	Invalid		
Description			
<p>Hi,</p> <p>i'm currently testing Redmine 5.0.5 which is an upgrade from 4.2.3</p> <p>I notice that images containing spaces in the filename that we upload through CKEditor aren't displayed anymore.</p> <p>Also the image selector shows the filename up until the space.</p> <p>ie, an image called 'IMG_2023 Forest.png' will show up as 'IMG_2023' with then an 'image not available' cross in the thumbnail for what should be the image.</p> <p>How can i make it so that the spaces in the filename arent an issue anymore?</p> <p>Attached is a screenshot showing how it looks in 4.2.3 (left) and 5.0.5 (right)</p>			

History

Hi,

I had same issue with CKEditor Plugin (Redminex) when I upgrade Redmine from 4 to 5.

In the CKEditor plugin you can fix it by editing the following file :

%{REDMINE_HOME}/plugins/redmine_ckeditor/rich/lib/rich/url_generator.rb

and change the **escape_url** method by :

```
def escape_url(url)
  if url.respond_to?(:escape)
    url.escape
  else
    #escaped = URI.escape(url).gsub(escape_regex){|m| "%#{m.ord.to_s(16).upcase}" }
    #CGI.escape(url).gsub("%2F", "/") <= The wrong escape
    url
  end
end
```

Hope that help,

Eric

Hi eric,

that seems to have fixed the issue.

Thank you very much

BR,

#3 - 2023-10-23 04:34 - Mischa The Evil

- Affected version changed from 5.0.4 to 5.0.5

#4 - 2025-02-17 09:37 - BeWog D

I'm using Redmine-5.1.6 with Redmine CKEditor plugin 1.2.4 and the bug is still here.

It works with this correction.

Regards

#5 - 2025-02-18 12:06 - Holger Just

- *Status changed from New to Closed*
- *Resolution set to Invalid*

It seems that this issue is entirely caused by the CKEditor plugin.

Unfortunately this is something we can not do anything about here. Please contact the authors / maintainers of the plugin instead so that they may update the plugin for current Redmine compatibility.
