#### Description

Hi,

i'm currently testing Redmine 5.0.5 which is an upgrade from 4.2.3

I notice that images containing spaces in the filename that we upload through CKEditor aren't displayed anymore.

Also the image selector shows the filename up until the space.

ie, an image called 'IMG\_2023 Forest.png' will show up as 'IMG\_2023' with then an 'image not available' cross in the thumbnail for what should be the image.

How can i make it so that the spaces in the filename arent an issue anymore?

Attached is a screenshot showing how it looks in 4.2.3 (left) and 5.0.5 (right)

#### History

Hi,

I had same issue with CKEditor Plugin (Redminex) when I upgrade Redmine from 4 to 5.

In the CKEditor plugin you can fix it by editing the following file :

```
%{REDMINE_HOME}/plugins/redmine_ckeditor/rich/lib/rich/url_generator.rb
```

and change the **escape\_url** method by :

```
def escape_url(url)
  if url.respond_to?(:escape)
    url.escape
  else
    #escaped = URI.escape(url).gsub(escape_regex){|m| "%#{m.ord.to_s(16).upcase}" }
    #CGI.escape(url).gsub("%2F", "/") <= The wrong escape
    url
  end
end
```

Hope that help,

Eric

Hi eric,

that seems to have fixed the issue.

Thank you very much

BR,

##### #3 - 2023-10-23 04:34 - Mischa The Evil

- Affected version changed from 5.0.4 to 5.0.5
