Target version:				
Resolution:	Invalid		**Affected version:**	5.0.4

Description

Hello,

i updated my redmine system from 4.1 to 5.0.5 and moved to a newer Server.
Unfortunately i got problems with the SMTP configuration.

my config looks like this: #
email_delivery:
delivery_method: :smtp
smtp_settings:
address: "IP-Adress"
port: 25
authentication: :none
enable_starttls_auto: false
openssl_verify_mode: 'none'

This worked fine on the old version.
But now its not working. Did i miss something?

History

#1 - 2023-09-18 18:09 - Eddie Serious

i set the enable_starttls_auto: from false to true. that solved the problem

#2 - 2023-09-18 20:54 - Holger Just

- Status changed from New to Closed

- Resolution set to Invalid
