Target version:			
Resolution:			
Description There are 2 email views + test_email.html.erb + test_email.text.erb having no localized text: <pre># test_email.html.erb <p>This is a test email sent by Redmine.
 Redmine URL: <%= link_to @url, @url %></p></pre> <pre># test_email.text.erb This is a test email sent by Redmine. Redmine URL: <%= @url %></pre> Supporting a translated text also for test email is only little effort but would improve consistency and user experience.
