

## Redmine - Feature #3912

### Add support for AND's and OR's in search

2009-09-24 02:10 - Burt Culver

<b>Status:</b> New	<b>Start date:</b> 2009-09-24
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b> Search engine	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b> Unplanned backlogs	
<b>Resolution:</b>	
<b>Description</b>	
I'd like to make a search list that checks for two different phrases in the subject line. I can't do that currently and have to have two different lists. Add the ability to match on "this OR that" or "this AND that".

Related to Redmine - Feature # 2865: One click filter in search view	<b>Closed</b> <b>2009-02-28</b>

#### History

##### #1 - 2009-10-16 23:56 - jason axelson

This would be nice, but in my personal opinion, I would rather see a generic text box that had support for advanced queries like this à la Google search.

##### #2 - 2011-05-27 16:24 - Etienne Massip

- Target version set to Candidate for next major release

related to #3912

Would like to see wildard search, means prefix (**myserachword**) **search**, **suffix search (mysearchword)**, exact match search ("my search term in double quotes, but nothing else") and regular expressions (\*. this is my number: /d+)
