

Redmine - Defect #39125

Markdown list bullet points (and text) are hidden after a certain depth

2023-09-27 06:48 - James Brady

| Resolution: | Invalid | | |
| Description When using lists with markdown formatting, if your bullet points are nested too deeply, the text - and eventually the bullet point - will be hidden. This happens regardless of whether you use '-' or '*' characters for the bullet points. It also happens with both unordered and ordered lists. Here's an example of the entered markdown text. As you can see, every bullet point has text, and it goes down to both a level 6 and level 7. 01.png Here's the rendered preview. As you can see, level 6 bullet points are visible, but the text is hidden. At level 7, both the bullet point and text are hidden. 02.png 05.png Also, if the indentation for any one bullet point uses too many spaces, the whole list breaks: 03.png Below is the version of redmine I am using: 04-versions.png | | | |

History

#1 - 2024-12-02 03:27 - Go MAEDA

- Status changed from New to Needs feedback

The Markdown engine "Redcarpet," used in your Redmine 4.2.1, was removed in Redmine 6.0.0 and replaced by a new Markdown engine, "CommonMarker."

Please check if the issue can be reproduced in Redmine 6.0.0.

#2 - 2025-04-21 07:53 - Marius BĂLTEANU

- Status changed from Needs feedback to Closed

- Resolution set to Invalid
