

Redmine - Defect #39125

Markdown list bullet points (and text) are hidden after a certain depth

2023-09-27 06:48 - James Brady

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Text formatting	Estimated time:	0.00 hour
Target version:		Affected version:	4.2.1
Resolution:			
Description			
<p>When using lists with markdown formatting, if your bullet points are nested too deeply, the text - and eventually the bullet point - will be hidden. This happens regardless of whether you use '-' or '*' characters for the bullet points. It also happens with both unordered and ordered lists.</p> <p>Here's an example of the entered markdown text. As you can see, every bullet point has text, and it goes down to both a level 6 and level 7.</p> <p>01.png Here's the rendered preview. As you can see, level 6 bullet points are visible, but the text is hidden. At level 7, both the bullet point and text are hidden.</p> <p>02.png 05.png Also, if the indentation for any one bullet point uses too many spaces, the whole list breaks:</p> <p>03.png Below is the version of redmine I am using:</p> <p>04-versions.png</p>
