

## Redmine - Feature #3921

### Google Wave + Twitter = Commie Plugin

2009-09-25 03:43 - Michael Koch

<b>Resolution:</b>	
<b>Description</b> Hello everyone, Our team started development of a plugin nicknamed "Commie" that looks to integrate both Google Wave (as internal communication) and Twitter (as external communication) into one plugin.  Currently, the plugin has been dormant as the developer has been busy with other projects and unable to complete the project. We were hoping that maybe there was someone who would be interesting in helping to finish it, and maybe even expand or take the project in a different direction.  Below is the repo for the plugin. <a href="http://github.com/binaryseed/redmine_commie">http://github.com/binaryseed/redmine_commie</a>  From functional level, I think this plugin could be hugely useful in making communications more robust in redmine, especially since Google Wave will be completely open source once it is released.  Lets discuss this more, as I'd love to hear your alls thoughts.  Thanks, Mike

Hi,  
i liked of this idea...  
i will study this.

Bye

##### #3 - 2009-10-08 01:13 - Michael Koch

Hello Patrick,  
I'm glad you are interested in this plugin. Let me know if there is anything I can do to help move this along!  
Mike

##### #4 - 2009-10-08 21:28 - Patrick Kaminski

Hi Michael.

I had problem with the database creation.  
I executed the rake command, but the creation of tables of the plugin not worked.

You have the sql code to give me?

Thanks

Patrick

**#5 - 2009-10-13 09:07 - Yousef Alhashemi**

Patrick,

What's the error your get?

**#6 - 2009-10-13 14:04 - Patrick Kaminski**

Hi,

I do not remember because I created the structure of the database by analyzing the db files.

But now I have a problem with the script from Twitter.

I must comment line 26 of file '/apps/views/commie/project.html.erb', because this is preventing the start of Redmine with the error log: 'ActionView::TemplateError (undefined method `map' for 1:Fixnum) on line #26 of commie/project.html.erb'

I have doubts about the values of the fields 'token' and 'secret' of the table 'twitters'.  
Where do I get these values?

Thank you,  
Patrick

**#7 - 2009-11-02 23:35 - Michael Koch**

Here is more information on the release of the Google Wave protocol:

<http://googlewavedev.blogspot.com/2009/11/wavesandboxcom-federate-this.html>

**#8 - 2009-12-09 06:59 - Michael Koch**

It might be worthwhile to wait for EtherPad & AppJet to go OpenSource then integrate those.

**#9 - 2010-06-11 03:47 - hanjiang zheng**

hi when i use command : "rake db:migrate\_plugins RAILS\_ENV=production" to update database ,  
it show this error :

**#11 - 2010-06-11 10:11 - Michael Koch**

hanjiang,  
the plugin needs further development. are you interested in helping? i can contact the original developer and see if he can help if you are.

thanks,  
mike

**#12 - 2011-06-29 13:34 - Gergely Nagy**

Oops, maybe I'm too late joining this club, but this looks interesting.  
What I would especially need is some integration/conversion between Waves and Wiki pages and perhaps Issues.  
The use case: for collaborative project planning, discuss/brainstorm the initial ideas in Wave, and then solidify them in Redmine afterwards.

Of course it would be great to have Wave's power in editing Wiki pages in general.  
This is a recent idea, haven't thought through, just wondering if it rings the bell for anyone.  
Thanks, Gergo

**#13 - 2011-07-24 23:48 - Terence Mill**

I would like to look into it, but the git repository does not exist!

**#14 - 2011-07-24 23:53 - Terence Mill**

Moved here [https://github.com/patrix/redmine\\_commie](https://github.com/patrix/redmine_commie) ?

Looks like u missing the gem "twitter\_oauth". Try to isatll that first.

```
gem install twitter_oauth
```

However, this plugin is missing some basic documetation:  
Howto install, prerequisites (wave server?), know bugs, todo, roadmap..

Wave is dead... and it seems that this issue is not the best place to keep this plugin alive (resp. in zombie state). It would seem better to put it on github or somewhere else, and let people fork it from there (and who knows, perhaps somebody gets interested in reviving it).

But this issue should be closed.

**#18 - 2015-03-06 04:39 - Go MAEDA**

- *Status changed from New to Closed*

Both the plugin and Google Wave are not alive now.  
I close this issue.
