Description			
<p><i>When you are trying to log more charged hours to a task than it was expected, there should be a pop up warning to the user. This way the user can report to the project owner, that a extension of this task / work package is needed. Then it will be easier to keep track of the used and open hours in hour based contracts with the customer.</i></p>			
Is there any plugin or Redmine feature to achieve that?
