Redmine - Feature #3924

Shoud be able to modify the filename and it's description and remove the file which user upload in the Wiki.

Description

Hi all,
Firstly, thanks for the fantastic open source project Redmine, it's really a good tool for project management.
However, today, I wrote something about my project in the Wiki of Redmine.
I uploaded a PDF file with a bad name and bad description, so I want to modify the file name and description, but there isn't a functon for modifying the uploaded file name and it's description.
OK, I give up modifying the file name and it's description, because I can change my file name locally, and then upload it again and rewrite it's description.
However, I am mad with the situation: I can't remove the file which I want delete, so I must delete the whole current wiki document page.
Lastly, I look forward to your reply.

There's a specific permission to delete wiki attachments.
See 'permissions/wiki/delete attachments'.

Firstly, so sorry to respond to you now.
I am so sorry to miss the function 'permissions/wiki/delete attachments'.
However, the description of attachment couldn't mofify. Do you think it's necessary?
