Resolution:	Fixed		
Description			
Hi,			
I got an undefined method `custom_field' for nil:NilClass error at https://www.redmine.org/projects/redmine/repository/svn/entry/tags/5.0.6/lib/redmine/export/pdf/issues_pdf_helper.rb#L342 .			
The error occurs when you try to PDF export a custom field block column that is not part of the tracker of the exported ticket(s). In that case issue.visible_custom_field_values does not contain a custom value for the column, cv is nil and cv.custom_field fails.			
<pre>cv = issue.visible_custom_field_values.detect do v v.custom_field_id == column.custom_field.id end is_html = cv.custom_field.full_text_formatting?</pre>			
Best regards, Thomas

Here is a possible fix:

```
cv =
  issue.visible_custom_field_values.detect do |v|
    v.custom_field_id == column.custom_field.id
  end
next if cv.nil?
is_html = cv.custom_field.full_text_formatting?
```
