Description

I have two user groups in a project. When they are assigned the same role, the LAST member of the first group in the display is shown to be in the second group. If the roles for the groups are different, the display is fine.

Experienced in trunk.

History

#1 - 2009-12-26 17:18 - Jean-Philippe Lang

- Status changed from New to Closed

Members are now sorted by roles, users first then groups.
