

Redmine - Feature #3964

display SCM commits in issue tracker

2009-10-04 01:17 - Sean Frequency

Status:	Closed	Start date:	2009-10-04
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:			
Resolution:	Invalid		
Description			
It would be a priceless feature to have Mercurial (or any other SCM) commit messages, which actually do refer to issues, displayed within the issue tracker. That way it's a lot easier to keep track of the source code changes, which relate to a particular issue.			

History

#1 - 2009-10-04 03:26 - Eric Davis

- *Category set to SCM*
- *Status changed from New to Closed*
- *Resolution set to Invalid*

This has been implemented. For an example, [#3865](#) shows a svn revision that is related to that issue (and other issues).

#2 - 2009-10-06 05:00 - Eric Davis

Sean Frequency asked me about the documentation for this and I thought it would be useful to post it here for future searchers:

Closing or linking SCM commits to issues is done by referencing the issue numbers in the commit messages. There are examples as well as a description of the different settings on the wiki at [RedmineSettings](#). The commit log for [r473](#) allow has some documentation about linking a commit message.
