<b>Target version:</b>	
<b>Description</b>	
<p>The change in <a href="#">#38772</a> prevents usage, if a class is a subclass of CustomField, e.g UserCustomField. No filter group name is used, because of this change. "Translation missing: de.field_cf_19" is used instead of the name of the custom field.</p> <p>This patch solve this problem.</p> <pre>def &lt;=&gt;(field) -   return nil unless field.is_a?(CustomField) +   return nil unless field.is_a?(self.class)    position &lt;=&gt; field.position end</pre> <p>See <a href="https://www.redmine.org/projects/redmine/repository/svn/diff/trunk/app/models/custom_field.rb?utf8=%E2%9C%93&amp;rev=22269&amp;rev_to=22013">https://www.redmine.org/projects/redmine/repository/svn/diff/trunk/app/models/custom_field.rb?utf8=%E2%9C%93&amp;rev=22269&amp;rev_to=22013</a></p>	

#### History

##### #1 - 2023-11-22 20:24 - Alexander Meindl

The patch does not work, sorry. I suppose I have to search for the real solution for that.

This issue can be closed, I can create a new issue, if I've more information.
