Redmine - Defect #3977

Redmine.pm Random Issue on Large Checkout/Commit

2009-10-06 12:53 - Yoann Besson

Status:	New		**Start date:**	2009-10-06
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM extra		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	0.8.5

Description

Hi,

I've just got Redmine.pm module working with (small actions) but in case of large checkout/commit i got random DAV issues ...

```
REPORT of '/svn/myProject/!svn/vcc/default': Could not read response body: Connection reset by peer

OPTIONS of '/svn/myProject/!svn/vcc/default': Could not read response body: Connection reset by peer

MERGE of '/svn/myProject/!svn/vcc/default': Could not read response body: Connection reset by peer
```

Here is my Apache Configuration :

```
PerlLoadModule Apache::Redmine
<Location /svn>
    DAV svn

    SSLRequireSSL
    SVNParentPath "D:\Svn"
    SVNListParentPath On
    SVNPathAuthz off

    AuthType Basic
    AuthName "Subversion repository"
    Require valid-user

    PerlAccessHandler Apache::Authn::Redmine::access_handler
    PerlAuthenHandler Apache::Authn::Redmine::authen_handler

    RedmineDSN "DBI:mysql:database=redmine;host=localhost"
    RedmineDbUser "xxxx"
    RedmineDbPass "xxxx"
</Location>
```

I'm running Redmine on Windows Server 2008 x64 with ActiveState Perl 5.10, Apache 2.2.13 with OpenSSL 0.9.8k, Subversion 1.6.5.

Redmine and Redmine.pm is running in LDAP authentication mode.

Note that without Redmine.pm module all is working fine.

Thanks.
