

Redmine - Feature #39882

Highlight selected version on the Roadmap view

2023-12-20 02:59 - Mischa The Evil

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Roadmap	Estimated time:	0.00 hour
Target version:	Candidate for next major release		
Resolution:			
Description			
It can be helpful to have the selected version's heading highlighted on the Roadmap (versions#index) view. This would also be in line with what we currently already have for selected issue journals, forum topic replies (i.e. messages) and wiki page headings. This proposed highlight could have a border-radius dependent of #39880.

To implement this feature, you would need to make changes to the frontend code of your application. Here's a general outline of the steps you could take.

- Identify the component responsible for rendering the Roadmap view in your application's frontend codebase.
- Add logic to determine which version is currently selected or active.
- Modify the rendering of the version headings to apply a highlight style to the selected version.
- Define the highlight style, including any border-radius specifications, in your application's CSS or styling framework.
- Test the feature thoroughly to ensure that the selected version is appropriately highlighted and that the highlighting behaves as expected across different browsers and devices.
- Additionally, considering the existing implementation for highlighting selected issue journals, forum topic replies, and wiki page headings can provide valuable insights and help maintain consistency across your application's UI.

- File highlight-roadmap-version.diff added
- Target version set to Candidate for next major release

I made a patch that implements this.
