

Redmine - Patch #39971

Remove specific platform constraints for database adapter gems

2023-12-29 06:21 - Go MAEDA

Target version:	6.0.0		
<b>Description</b>			
<p>This patch simplifies the Gemfile by removing the :platforms constraints from the database adapter gems.</p> <p>Since Redmine used to support JRuby, the Gemfile included platform-specific dependencies to use different database adapters for JRuby and MRI Ruby. However, the database adapter gems for JRuby were removed from the Gemfile in <a href="#">r16517</a>, making these platform-specific conditions no longer necessary.</p>
