Redmine - Patch #39971
Remove specific platform constraints for database adapter gems
2023-12-29 06:21 - Go MAEDA

Status: Closed
Priority: Normal
Assignee: Go MAEDA
Category: Code cleanup/refactoring
Target version: 6.0.0

Description
This patch simplifies the Gemfile by removing the :platforms constraints from the database adapter gems.

Since Redmine used to support JRuby, the Gemfile included platform-specific dependencies to use different database adapters for JRuby and MRI Ruby. However, the database adapter gems for JRuby were removed from the Gemfile in r16517, making these platform-specific conditions no longer necessary.
