History

#1 - 2009-12-04 19:17 - Jean-Philippe Lang

- Target version set to 1.0.0 (RC)

#2 - 2009-12-18 06:13 - Richard Schulte

+ 1

- Theme
- Trackers/Statuses/Workflow
- Enumerations
- Roles and Permissions

Haha yea, a laundry list, I know. Just the top two would be great.

#3 - 2009-12-20 06:49 - Michael Koch

+1 and agree with Richard. This would be a great feature (and much needed for our project!)

#4 - 2010-01-12 09:55 - Nikolay Kotlyarov

+1

- **Trackers/Statuses/Workflow**
- Enumerations
- **Roles and Permissions**

#5 - 2010-01-12 10:00 - Nikolay Kotlyarov

Workflow enhancements related to [#559](#)

#6 - 2010-01-13 11:14 - Anton Statutov

IMO, the main settings need to override are columns displayed in the issue list.

#7 - 2010-03-24 09:52 - Nikolay Kotlyarov

Which settings do you mean by "some"?:)

#8 - 2010-05-31 14:58 - Mischa The Evil

Added issue-relations to:

- issue [#1853](#)
- issue [#2076](#)
- issue [#4049](#)
- issue [#5624](#)

#9 - 2010-06-03 23:15 - Richard Schulte

Just wondering, what settings are you all honing in on?

#10 - 2010-06-15 00:50 - Eric Davis

- Target version deleted (1.0.0 (RC))

Removing from 1.0. This hasn't been completed and 1.0 is feature frozen.

#11 - 2011-01-12 13:22 - Marcelo Fernandes

+1 I do need enable/disable 'Documents' Section per project.

#12 - 2011-04-14 01:00 - Matthew Burton

+1. I think this is the feature that would make Redmine a more viable option for enterprises (like mine). When you have many different users and missions, it's hard to find one set of enumerations, roles, and trackers that makes everyone happy yet at the same time isn't overly cumbersome for administrators. This would also relieve the IT office from sole responsible for administration, as it would give many administration permissions to project managers.

Been lurking for a few months and really love RM. I created an account just so I could speak up for this feature.

#13 - 2011-04-14 10:08 - Etienne Massip

- Assignee deleted (Jean-Philippe Lang)

- Target version set to Candidate for next major release

#14 - 2012-05-07 13:32 - Michael Flyorko

+1

#15 - 2012-05-18 03:18 - Brad Rushworth

For everyone's info, there is a plugin that allows user-selectable themes and it works great:

http://www.redmine.org/plugins/themechanger

#16 - 2012-11-22 21:29 - Thomas Robbs

+1 and +1 Matthew Burton.

It seems the burden is mainly due to the "project-y" settings being mixed with the "application-y" settings. For example, configuring "Default columns displayed on the issue list" in the application level settings.

I'd suggest just separating settings along these lines into two camps:

1. Redmine Settings (app level stuff)
2. Project Templates (project level stuff)

#2 effectively starts out as a "Default Project" template, defined by the existing default "project level stuff" settings.

A new installation would be effectively transparent, save some reorganization of the settings and adding the notion of "templates".

An existing installation would, on upgrade, and ideally for me, give me the option to save each of my existing projects' configurations as new templates (default name = project name, editable), or use an existing template of my choice.

I could also see this notion extending to Trackers and Categories as there are similar requests that pull the solution towards needing to be sufficient for their needs as well. Might be helpful to map the entities and their configuration options to make the solution more obvious.

#17 - 2013-03-25 03:34 - Dipan Mehta

+1. This would be a great leap forward in the Redmine's capability. A strong request to have this.

Also add #850 as a related issue.

#18 - 2013-03-26 07:10 - Toshi MARUYAMA

Dipan Mehta wrote:

Done.

#19 - 2013-04-09 12:44 - Dipan Mehta

Another related issue #2058

#20 - 2013-04-09 14:01 - Daniel Dehennin

+1 with "Required" (#10027)

#21 - 2013-04-10 12:47 - Dipan Mehta

There are just about so many issues which asks for 'Per project configuration'. Here is a list:

1. #3452, - Email notification config (alongwith #7349, #8331)
2. #1144 - Time tracking activities
3. #552   - Document categories
4. #12347 - Calculation logic of issue %done ratio
5. #12044 - Notification Mails per Project
6. #9194 - default issue list view layout
7. #7244 - default query
8. #3316 - Language! ...aaha
9. #432   - Custom Email templates and email settings

#22 - 2013-07-02 14:47 - Glenn Gould

+1 - most wanted feature for me... ;)

#23 - 2014-02-10 06:25 - Toshi MARUYAMA

- Related to Feature #8095: Allow overriding the default text formatting in each project added

#24 - 2014-02-10 06:29 - Toshi MARUYAMA

- Related to deleted (Feature #5624: the Text formatting configuration in each project.)

#25 - 2015-05-13 04:22 - Toshi MARUYAMA

- Related to Feature #7360: Issue custom query: default query per instance, project and user added

#26 - 2015-05-13 04:22 - Toshi MARUYAMA

- Related to deleted (Feature #7244: Default query per project)

#27 - 2020-06-11 04:50 - Mizuki ISHIKAWA

I attach a patch to override application settings at the project level.
This is not a tested or fully implemented patch, it was created to get your design reviewed.

- Add Setting.project_id column
- Setting for each project if setting.project_id exists, application-wide setting if setting.project_id is nil
- Setting.welcome_text is how to get the application settings, and project.setting_welcome_text is how to get the settings for each project.
- project.setting_welcome_text returns the same result as Setting.welcome_text if the record of @Setting.where(project_id: project.id, name:'welcome_text') does not exist

This patch allows you to change "Isuses list defaults" on http://<url>/projects/<project_id>/settings/overwrite_global_settings page as a trial.

#28 - 2020-06-11 04:55 - Mizuki ISHIKAWA

- File draft-4015.patch added

The patch I intended to attach at #4015#note-27
