| Target version:   | 6.0.0                    |                 |           |
| <b>Description</b>  |                          |                 |           |
| The file appveyor.yml ( <a href="#">source:trunk/appveyor.yml@22697</a> ) in the root directory, a configuration for a CI/CD service <a href="#">AppVeyor</a> , is not maintained for many years. |                          |                 |           |
| The latest version of Ruby described in the file is Ruby 2.2, so it must be unusable now and no one is using it.  |                          |                 |           |
