[HowTo_create_a_custom_Redmine_theme](#)

Following the successful migration to Asset Pipeline, it's crucial to update our Wiki pages related to custom themes. Specifically, we should revise documents like "HowTo_create_a_custom_Redmine_theme."

Please assign this task to the relevant team members and ensure that the documentation reflects the changes introduced by the Asset Pipeline migration.

[[HowTo_create_a_custom_Redmine_theme <https://www.catneedsbest.com/>]]

Access Assets:
Navigate to the 'themes' directory for custom theme assets.

Asset Structure:
Understand the new structure and update theme files accordingly.

Stylesheets and JavaScript:
Utilize Asset Pipeline for managing stylesheets and JavaScript files.

Image Handling:
Adjust image paths to align with Asset Pipeline's streamlined handling.

Plugin Compatibility:
Confirm plugin compatibility and update configurations if needed.

Testing:
Thoroughly test the theme under Asset Pipeline for any issues.

Documentation:
Update the Wiki page with the revised steps for post-migration theme creation.
