

Redmine - Defect #40239

Add missing fixtures in Redmine::ApiTest::IssuesTest

2024-02-15 10:15 - Vincent Robert

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Marius BĂLTEANU	% Done:	0%
Category:	Code cleanup/refactoring	Estimated time:	0.00 hour
Target version:	5.1.2	Affected version:	
Resolution:	Fixed		
Description			
The test "POST /issues.xml with watcher_user_ids should create issue with watchers" in Redmine::ApiTest::IssuesTest is failing if we run only this one.			
We should add the fixture "user_preferences" in the issues_test.rb file.			
It is due to the new "add_auto_watcher" features, which automatically set the author as a watcher by default. The author is added to all new issues if we don't load the preferences.			

Associated revisions

Revision 22734 - 2024-02-26 00:22 - Marius BĂLTEANU

Adds :user_preference fixture to Redmine::ApiTest::IssuesTest (#40239).

Patch by Vincent Robert (@Nanego).

Revision 22735 - 2024-02-26 07:14 - Marius BĂLTEANU

Merge r22734 from trunk to 5.1-stable (#40239).

History

#1 - 2024-02-26 07:15 - Marius BĂLTEANU

- Category set to Code cleanup/refactoring
- Status changed from New to Closed
- Assignee set to Marius BĂLTEANU
- Resolution set to Fixed

Committed, thanks!

#2 - 2024-03-19 15:39 - Vincent Robert

Hi.
It seems the revision has been backported to test/system/issues_test.rb instead of test/integration/api_test/issues_test.rb
I managed to reproduce the failing test with Redmine 5.1.2

You're right, sorry for this. I've merged now [r22773](#) to 5.1-stable.
