<b>Resolution:</b>			
<b>Description</b>			
Hello,			
I have an issue on Redmine 5.1.1, on the issues page, when I want to applicate filter, for example "Tracker", it doesn't display the list of tracker, so it's impossible de filter and applied.

I noticed some field aren't the http request call, for example I tried to add the field autor, it work's and we can sen in the console the http request.

But if I tried with the field tracker, there is no request http (Cf. attachement)

clipboard-202402281511-btnrz.png

So, I tried to test the http request for this field ans it works :

[https://www.example.com/queries/filter?project\\_id=12&type=IssueQuery&name=tracker\\_id](https://www.example.com/queries/filter?project_id=12&type=IssueQuery&name=tracker_id)

"\ A déterminer ", "113"], [" Dysfonctionnement ", "114"], [" Assistance ", "115"], [" Installation ", "116"], [" Maintenance ", "117"], [" Evolution ", "131"

I think it's a Javascript problem.
