<div>Description</div> <p>ApplicationHelper has already been included in ActionView::TestCase. Although some test classes inherit from ActionView::TestCase, they include ApplicationHelper in their own classes again. Therefore, we don't need to include ApplicationHelper in those classes because it is already included.</p> <p>For example, the ancestry of WikiFormatting::MacrosTest is as follows, and it includes ApplicationHelper in the WikiFormatting::MacrosTest class again.</p> <ul style="list-style-type: none"><li>WikiFormatting::MacrosTest &lt; Redmine::HelperTest &lt; ActionView::TestCase</li></ul>
