Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			

Description

Hello,  
on following link:  
<https://www.redmine.org/boards/2/topics/36299>  
i found example how to do "full search" by **something**.  
Like this:  
[http://www.redmine.org/issues.xml?project\\_id=redmine&cf\\_2=\\*ix\\*&limit=100](http://www.redmine.org/issues.xml?project_id=redmine&cf_2=*ix*&limit=100)  
  
but is returns much more result than required.

For example:  
clipboard-202405040952-xmekf.png

Duplicate doesnt contain "ix"

Please register as bug to be corrected.

PS: It works same on 5.1.2.stable version.  
Searching **"\*man"** and returns record with:  
<custom\_field id="6" name="HBpotencialProviders">  
<value>15,16</value>

Thanks Petr

History

#1 - 2024-05-04 10:05 - Petr Müller

I noticed just now that **"\*something"** doesnt work.  
Sorry, please reject this issue :(  
If you could direct me where is explain how regular expresions works in Redmine REST API, please help.  
Thanks for understanding.  
Petr
