Redmine - Defect #40665

unable to insert inline code text due to overlap with @mention plugin

2024-05-07 12:21 - Milind Changire

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	

Description

The mention plugin uses the trigger to present a pop-up list of user names and the markdown suggests embedding inline pre-formatted code using code semantics.

Kindly resolve the clashing user interface issue.

History

#1 - 2024-05-07 17:49 - Marius BĂLTEANU

- Status changed from New to Closed

- Resolution set to Invalid

Mention plugin is not part of Redmine so you should contact plugin author for this kind of issues. However, please note that starting from Redmine 5.0.0, mention feature is part of Redmine core, please see #13919 for more details. If you have any issue with the core feature, you can reopen this issue, but first you need to try without the custom plugin.
