Resolution:	Duplicate	**Affected version:**	

Description

Hello, I think your plugin is great, I spent two days looking for how to create a data table for an issue, without success.
Thank you very much.
Just a remark: when I go to the list of issues, when I want to display a custom column defined in a table in custom table, no column from my table appears. If I could make a table column appear in the items options, that would be great.

Otherwise great plugin

I set defect as type, sorry, I'm new to the platform.

#2 - 2024-05-09 23:57 - Adabla Adabla

I'm sorry but I didn't understand. I'll re-upload from github and test?

#3 - 2024-05-12 15:53 - Adabla Adabla

Is the project no longer functional? If it's still functional, then if it's possible to add custom table to the issues options to display as a column, that would be a good thing.
