<b>Target version:</b>	6.0.0		
<b>Resolution:</b>	Fixed		
<b>Description</b>			
<p>This patch changes the "List of languages supported by Redmine code highlighter" page in the help to be dynamically generated.</p> <p>Currently, if the Rouge library adds new languages, someone has to manually update a list in the file <code>app/views/help/wiki_syntax/code_highlighting_languages.html.erb</code>. This method takes time and can lead to mistakes.</p> <p>With this patch applied, the help page will automatically show any new languages that Rouge starts supporting. This means the list will always be up-to-date without needing manual changes.</p>
