Target version:			
<div>Description</div> <p>Hello, I think your plugin is great, I spent two days looking for how to create a data table for an issue, without success. Thank you very much for your plugin.</p> <p>Just a remark: when I go to the list of issues. in options, when I want to display a custom column defined in a table in custom table, no column from my table appears. If I could make a table column appear in the issues options, that would be great.</p> <p>Otherwise great plugin.</p> <p>Is the project no longer functional? If it's still functional, then if it's possible to add custom table to the issues options to display as a column, that would be a good thing.</p>
