Description

1. Adding Syntax Highlighting in Wiki pages should be as simple as adding a javascript library for this (CodeHighlighter, etc.). And usage would be:

```
echo "hello world";
```

2. Syntax Highlighting in the Repository for files/diffs would be great, but trickier (CodeRay/Syntax/etc.
+ file.mime_type)

History

#1 - 2007-08-15 16:21 - Jean-Philippe Lang

I've just committed (rev 644) syntax highlightment for files in the repository.

#2 - 2007-08-15 16:24 - Jean-Philippe Lang

Have a look here:

http://demo.redmine.org/repositories/entry/1?path=trunk%2Fapp%2Fcontrollers%2Frecipes_controller.rb

#3 - 2007-08-16 03:19 - Andris Zāgeris

See http://rubyforge.org/forum/message.php?msg_id=26844 for additional CodeRay scanners (languages).

#4 - 2007-09-06 13:09 - Jean-Philippe Lang

Syntax highlighting in wiki pages is now also supported, using the same library (coderay).

Just use this exact syntax:

```
Place you code here.
```
