Redmine - Defect #4070

Wiki newline problem from Safari, Firefox on Mac OS-X

2009-10-21 13:37 - Cin TAKE

Status:	Closed		**Start date:**	2009-10-21
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Wont fix		**Affected version:**	0.8.5

Description

Issue:
when writing Wiki from OS-X, maybe newline is not recognized correctly.

Incident:
[CASE-1] writeing like this.

```
h1. MainTitle
h2. SubTitle
```

but looks like below AS 'H1' style.

```
MainTitle
h2. SubTitle
```

[CASE-2] good case with additinal newline;

```
h1. MainTitle

h2. SubTitle
```

looks like below AS first line with 'H1' style, and third line with 'H2' style.

```
MainTitle

SubTitle
```

```
------------------------
As Is writing
------------------------
```
[CASE-1]

MainTitle
h2. SubTitle

[CASE-2]

MainTitle

SubTitle

Environment:
~/redmine/script/about

I can confirm this behavior with safari 4 on OS X.6 on this redmine, as well as on our [r2902](#) installation.

#2 - 2009-10-24 13:22 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Wont fix

It's not a OS-X or Safari issue. You need 2 line breaks after any title.

So, are there any way to display Title-line and non-title-line without blank line between ?

Well, have a look at the html, it doesn't explicitly render the blank line there is between a h1 and a h2. I think the wiki syntax (which is just textile markup provided by [redcloth](#)) requires an additional blank line after headings so that you can have headings with explicit line-breaks. Please have a look at the [headings syntax for textile](#) for confirmation that this is intended behavior.
