Target version:				

Description

This patch optimizes the Issue#blocked? and Issue#duplicates methods with the following changes:

- Adds an early return if relations is empty, avoiding unnecessary database queries.
- Uses where` to filter relations directly in the database, improving query efficiency.

History

#1 - 2024-06-18 11:59 - Go MAEDA

- File optimize-issue-blocked-duplicates.patch added

#2 - 2024-06-19 01:45 - Go MAEDA

- Status changed from New to Closed

I withdraw this patch.
I found that this patch may generate more queries than before the change.
