**Description**

Updated my redmine installation from trunk [r2943](#) to [r2952](#). With this updates I experience an 500 Internal Server Error when I select enumerations in the administration. Creating a project runs in that error 500 too.

```
Processing EnumerationsController#index (for XXX.XXX.XXX.XXX at 2009-10-22 10:02:43) [GET]
  Parameters: {"action"=>"index", "controller"=>"enumerations"}
Rendering template within layouts/base
Rendering enumerations/list

ActionView::TemplateError (Mysql::Error: Unknown column 'enumerations.project_id' in 'where clause

  dispatch.fcgi:24

Rendering /home/xxxxx/etc/rails_apps/redmine/public/500.html (500 Internal Server Error)
```

Rollback solves the problem.

Thank you very much - that was it. All fine so far now.
